

JUBILEE® WORKSHOP PACK TO THE RESCUE

Throughout the world there is an infinite variety of uses and users of Jubilee® clips and many of these clips can be found in workshops and maintenance environments. Because of this Jubilee® recognised the need for a useful selection pack designed specifically for such environments and named it the Jubilee® Workshop Pack.

The attached photograph can be emailed, upon request to GSPR

The re-usable plastic Jubilee® Workshop Pack contains 143 assorted mild steel zinc plated worm drive hose clips, ranging in size from 9.5mm up to 40mm and has proved invaluable in numerous circumstances where a Jubilee® clip has been needed to come to the rescue.

Luckily, Team Mongol Shoebox were donated a Workshop Pack by L Robinson and Company, the manufacturers of premium brand Jubilee® clips, to carry in their toolbox during their 8,000 mile round trip to Mongolia and back. The team was taking part in the 2006 Mongol Rally event to raise money for many varied charities.

Driving a slightly venerable and well-used Suzuki SJ410, which chose to break down in deepest Siberia, miles from anywhere or anybody, the two team members had a major problem. An ingenious and unusual use of several Jubilee® clips selected from the Workshop Pack saved the day. The breakdown occurred when half of the outer collar of the water pump bearing snapped off preventing the fan belt from staying in place. Several Jubilee® Clips were undone and then rejoined together to form a number of worm drive housings around the missing section of the outer collar. By utilising the clips in this way, the team were able to drive out of trouble and the required 100 miles to the safety of the nearest town.

The couple in the team also became engaged during the trip and once again a Jubilee® Clip came to the rescue serving as an engagement ring.

Jubilee® designed the Workshop Pack to cover those occasions where various sizes of quality hose clips may be required for one or more simultaneous applications – or when the unexpected may occur.
